

FOR IMMEDIATE RELEASE

## iSIGN DELIVERS SECURE ESIGNATURE SOLUTION ON INGENICO GROUP SMART TERMINAL DEVICES

*First Commercial Sale to Top 3 U.S. Fitness Chain*

REDWOOD SHORES, CA, February 15, 2016 – iSign Solutions Inc. (“iSIGN”) (OTCQB: ISGN), a leading supplier of electronic signature and other software solutions enabling secure and cost-effective management of document-based digital transactions, today announced its technology partnership with Ingenico Group, the global leader in seamless payment, providing smart, trusted and secure solutions to empower commerce across all channels, in-store, online and mobile.

The iSIGN solution, combined with Ingenico Group’s smart terminals, offers the ability to sign contracts and other PDF documents using Ingenico smart terminals. The partnership enables existing and prospective Ingenico Group clients to use a legally-binding and secure electronic signature for business applications such as contracts, warranty programs and membership enrollment. The combined solution provides all the benefits of an iSign e-signature, including a detailed audit trail that is secured in the final PDF and that can provide evidence of tampering. iSIGN and Ingenico Group partnered to deliver their first combined commercial offering, a membership enrollment solution for a top 3 U.S. fitness chain.

“We are pleased to partner with Ingenico Group, whose multimedia and touchscreen payment solutions help companies around the world to accept a variety of payment options, including magstripe, EMV chip cards and NFC/contactless options, like Apple Pay and Android Pay,” said Philip Sassower, co-chairman and chief executive officer for iSIGN. “The integration with our Sign-it® for Acrobat software enables companies using Ingenico Group smart terminals to enjoy the full benefits of an end-to-end, easy-to-use document management solution on leading edge smart terminals. It is a testament to the combined iSIGN and Ingenico Group solution that a large U.S. fitness chain has selected our joint offering.”

“As consumers’ in-store experience continues to become more digital, it is important for merchants to be able to integrate e-signature into touch screens at the point of service,” said Nate Potter, director of strategic retail accounts for Ingenico Group. “Our first implementation with iSIGN reflects a growing interest within our installed base for a completely paperless and highly secure option to complete contracts and payments on the same screen.”

iSIGN's Sign-it® for Acrobat is a software application plug-in for Adobe Acrobat. Through this application, the electronic signature is applied following PDF standards as specified in ISO 32000 and can be validated using Adobe tools or any third-party utility that can validate PDF signatures. The application provides the ability to validate the signature at any point in the future. Multiple signature types are supported including click-to-sign, biometric signature verification, handwritten signatures and signature stamp. iSIGN's Sign-it® for Acrobat represents a state-of-the-art solution for enterprises, is easy to integrate, and is in production with some of the largest financial services firms in the world.

For more information on iSIGN's Sign-it® for Acrobat and iSIGN's family of products and services, please review our website at [www.isignnow.com](http://www.isignnow.com), and contact one of our sales directors.

#### ABOUT iSIGN

iSIGN (formerly known as Communication Intelligence Corporation or CIC) is a leading provider of digital transaction management (DTM) software enabling fully digital (paperless) business processes. iSIGN's solutions encompass a wide array of functionality and services, including electronic signatures, simple-to-complex workflow management and various options for biometric authentication. These solutions are available across virtually all enterprise, desktop and mobile environments as a seamlessly integrated software platform for both ad-hoc and fully automated transactions. iSIGN's software platform can be deployed both on-premise and as a cloud-based service, with the ability to easily transition between deployment models. iSIGN is headquartered in Silicon Valley. For more information, please visit our website at [www.isignnow.com](http://www.isignnow.com). iSIGN's logo is a trademark of iSIGN.

#### FORWARD LOOKING STATEMENTS

Certain statements contained in this press release, including without limitation, statements containing the words "believes", "anticipates", "hopes", "intends", "expects", and other words of similar import, constitute "forward looking" statements within the meaning of the Private Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties and other factors, which may cause actual events to differ materially from expectations. Such factors include the following (1) technological, engineering, quality control or other circumstances which could delay the sale or shipment of products containing the company's technology; (2) economic, business, market and competitive conditions in the software industry and technological innovations which could affect customer purchases of the company's solutions; (3) the company's inability to protect its trade secrets or other proprietary rights, operate without infringing upon the proprietary rights of others or prevent others from infringing on the proprietary rights of the company; and (4) general economic and business conditions.
